

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph on page 10, lines 5-11 as follows:

Within the housing 28 is an intercooling heat exchanger, generally designated 42, to be described in greater detail hereinafter. With reference to Fig. 1, it sufficient to note that the heat exchanger 42 has a cylindrical radially outer surface 44 which serves as an inlet for the compressed air to be cooled as shown by arrows ~~46~~ 45. The inlet surface 44 is, of course, in fluid communication with the compressed air directing space 36, and in particular, with the axially extending part 40 thereof.
